DETAILED ACTION

1. Claims 1-9, 24-27 and 29-39 are pending. Claims 10-23 and 28 are cancelled. Claims 24-27 are still withdrawn from consideration. The previous rejection is withdrawn, in part.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the data entry device, notification system, accumulator and the features recited from the dependent claims must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-9, 23-27 and 29-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 2, "a data entry device" is not clear. Neither the descriptive portion of the specification nor the drawings clearly disclose what comprises such. Applicant's REMARKS have been reviewed, but are not convincing.

Claim 1, line 3, "a notification system" is not clear as to what constitutes such.

Claim 1, line 5, "an accumulator" is not clear. The descriptive portion of the specification does not correlate with the drawings, e.g. Fig. 2, to clearly disclose what comprises such. Applicant's REMARKS have been reviewed, but are not convincing.

Page 3, lines 28-31 of the instant specification do not disclose such.

Claim 3, line 2, "parallel manner" is not clear in juxtaposition with the specification and drawings. No support for such is evident from the original disclosure.

Claim 6, lines 3, "and tandem browsing" is not clear in juxtaposition with the specification and drawings. Perhaps Applicant intends to claim "or tandem browsing" in order to provide clarity.

Claim 35, lines 2-3, "a network appliance" is not clear in juxtaposition with "an originating user" in juxtaposition with the original disclosure, e.g. page 4, lines 7-8. The specification indicates that these are the same entity. However, Applicant attempts to present each as a separate element. Clarification is required.

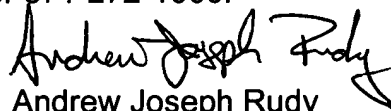

5. Claims 1-9 and 29-39, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Bezos et al., US 7,082,407.

Bezos discloses an electronic retail system comprising a notification module, e.g. 36-38, and an accumulator, e.g. Fig. 4, 152. Bezos does not explicitly disclose a data entry device. However, Bezos does disclose, e.g. col. 4, lines 57-67, a mechanism for making a purchase order. Official Notice is taken that Applicant's data entry device, notification system and accumulator have been common knowledge in the art prior to Applicant's filing date. To have provided Bezos a data entry device and accumulator for approval by an originating user would have been obvious to one of ordinary skill in the art in view of Official Notice.
